Alstrøm, P. *See* Hansen & Alstrøm

Balachandar, S., Mittal, R. & Najjar, F. M. Properties of the mean recirculation region in the wakes of two-dimensional bluff bodies, 167–199

Carnevale, G. F., Velasco Fuentes, O. U. & Orlandi, P. Inviscid dipole-vortex rebound from a wall or coast, 75–103

Friis, H. A. *See* Grue, Friis, Palm & Rusås

Goncharov, V. P. & Pavlov, V. I. Vortex structures generated by a coastal current in harbour-like basins at large Reynolds numbers, 201–221

Grue, J., Friis, H. A., Palm, E. & Rusås, P. O. A method for computing unsteady fully nonlinear interfacial waves, 223–252

Hansen, P. L. & Alstrøm, P. Perturbation theory of parametrically driven capillary waves at low viscosity, 301–344

Harper, J. F. Bubbles rising in line: why is the first approximation so bad?, 289–300

Hurley, D. G. The generation of internal waves by vibrating elliptic cylinders. Part 1. Inviscid solution, 105–118

Hurley, D. G. & Keady, G. The generation of internal waves by vibrating elliptic cylinders. Part 2. Approximate viscous solution, 119–138

Keady, G. *See* Hurley & Keady

Krishnamoorthy, S. *See* Marshall & Krishnamoorthy

Legras, B. *See* Paireau, Tabeling & Legras

Marr-Lyon, M. J., Thiessen, D. B. & Marston, P. L. Stabilization of a cylindrical capillary bridge beyond the Rayleigh–Plateau limit using acoustic radiation pressure and active feedback, 345–357

Marshall, J. S. & Krishnamoorthy, S. On the instantaneous cutting of a columnar vortex with non-zero axial flow, 41–74

Marston, P. L. *See* Marr-Lyon, Thiessen & Marston

Mittal, R. *See* Balachandar, Mittal & Najjar

Najjar, F. M. *See* Balachandar, Mittal & Najjar

Nikora, V. I., Sukhodolov, A. N. & Rowinski, P. M. Statistical sand wave dynamics in one-directional water flows, 17–39

Orlandi, P. *See* Carnevale, Velasco Fuentes & Orlandi

Paireau, O., Tabeling, P. & Legras, B. A vortex subjected to a shear: an experimental study, 1–16

Palm, E. *See* Grue, Friis, Palm & Rusås

Pavlov, V. I. *See* Goncharov & Pavlov

Pop, I. *See* Vynnycky & Pop

Pozrikidis, C. Instability of two-layer creeping flow in a channel with parallel-sided walls, 139–165

Rowinski, P. M. *See* Nikora, Sukhodolov & Rowinski

Rusås, P. O. *See* Grue, Friis, Palm & Rusås

Smith, D. R. & Smits, A. J. The effects of successive distortions on a turbulent boundary layer in a supersonic flow, 253–288

Smits, A. J. *See* Smith & Smits

Sukhodolov, A. N. *See* Nikora, Sukhodolov & Rowinski

Tabeling, P. *See* Paireau, Tabeling & Legras

Thiessen, D. B. *See* Marr-Lyon, Thiessen & Marston

Velasco Fuentes, O. U. *See* Carnevale, Velasco Fuentes & Orlandi

Vynnycky, M. & Pop, O. Mixed convection due to a finite horizontal flat plate embedded in a porous medium, 359–378
